Want to save energy and money? EWEB's energy experts are here to help

Our Energy Smart programs offer a variety of energy management services designed to encourage the efficient use of electricity in commercial buildings and industrial facilities. The Eugene Water & Electric Board is committed to helping our customers save energy and operating costs. Give us a call at (541) 685-7000 to take advantage of our services.

Get the Facts

Conserving energy makes sense

The energy that you save by participating in our programs reduces the amount of power EWEB buys. Rebates make sense when the cost of conservation is less than the cost of new electric generation.

EWEB has reviewed over 50% of the business facilities in Eugene. Find out how we can help your business save energy and money by visiting www.eweb.org, or call us at **(541) 685-7000**.

Our conservation programs help in a variety of ways

Rebates: Look for rebates for energy efficient products through our Energy Smart replacements program. Lighting, HVAC, and office equipment are just some of the items with rebates.

Customized Rebates/Loans: For large or complicated projects, participate in our Energy Smart improvements program for custom advice, custom rebates, and loans. If you have a project that saves electricity, then we can help.

Technical Advice: EWEB's energy experts are here to provide free technical information, efficient energy answers, power quality solutions, commissioning services, electrical monitoring, and more.

Industrial Efficiency: If you have a manufacturing facility, we can help you to reduce the amount of energy and money needed to create your products and operate your facility.

New Construction: EWEB's Energy Smart design program offers commercial developers, designers, and contractors a straightforward approach to encourage the installation of equipment that is more efficient than the building code requires.

Ready to get started?

- **Call** Energy Management Services at (541) 685-7000 or visit www.eweb.org to learn more about our programs, or simply complete and return the information card.
- **Decide** what program is right for your business.
- **Complete** the energy saving project.
- **EWEB assists** with the project costs.
- **You enjoy the benefits** of energy cost savings and the reliability of new equipment.
