EWEB'S Energy Smart Rebates For Business

EUGENE WATER & ELECTRIC BOARD

EWEB's Energy Smart Rebate Programs

Is your project on the fast track?

EWEB's streamlined rebates offer an easy-to-use way for you to get funding for common improvements in energy efficiency. We offer rebates for lighting, HVAC, and a range of other commercial equipment. Increase your profits by reducing energy waste with our Energy Smart rebates.

Rebates can be obtained by following these steps:

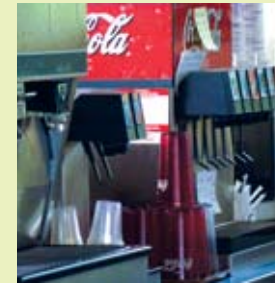

- 1 Call EWEB for rebate information and expert advice.
- 2 Decide which rebates are right for you.
- 3 Install the energy efficient equipment.
- 4 Send us the required documentation, and we'll send you a check.

To learn more, visit www.eweb.org, or call Energy Management Services at **(541) 685-7000**.

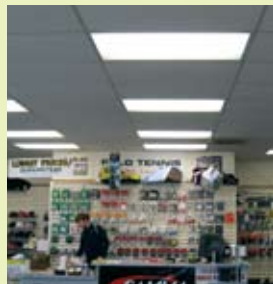

• Retrofit Lighting

Rebate items include retrofitting or replacing fluorescent fixtures with energy efficient lamps and ballasts, LED products, interior high-bays, efficient exterior fixtures, controls, and more.

• Food Services

Rebates for energy efficient food equipment include electric ovens, fryers, refrigerators, freezers, ice machines, food holding cabinets, and more.

• Small Business Lighting

If you have less than 5,000 watts of interior lighting, then this rebate program is for you. Replace existing lighting with energy efficient lighting at little or no cost.

• Commercial Refrigeration

Rebate items include controls, gaskets, door auto closers, fan motors, refrigeration case lighting, and more.

• New Construction Lighting

Rebates are available for efficient lighting design and other projects that surpass what is required by the Oregon Energy Code.

• Motors

Rebates are available for new motors that meet requirements of the National Electrical Manufacturers Association (NEMA). And ask us about "green rewinds."

• Heating, Ventilation, and Air Conditioning

Equipment eligible for our Energy Smart rebates includes programmable thermostats, premium ventilation, and efficient HVAC equipment.

• Miscellaneous Equipment

There are also rebates for thermal windows, package terminal heat pumps, and energy efficient office equipment.
