

WARM COMFORT

A message from the energy experts at EWEB:

Want to be warm
and comfortable
in the winter and
cool in the summer
while saving on
utility bills?

Ductless head units

Ductless heat pumps provide both heating and cooling, and they use less electricity than ceiling, wall and baseboard heat.

Save energy and money

With a ductless heat pump, you could save 25-50% on heating depending on the characteristics of your home.

Systems come with air conditioning built-in

Be comfortable during the hottest days and nights of summer.

Low-cost, easy installation

The ductless system only needs a three-inch opening in a wall or ceiling. Installation is as simple as mounting the indoor and outdoor units, connecting the refrigerant lines, and making a few electrical connections.

EWEB's energy experts are always looking for ways to help you lower your electric bill. That's why EWEB is helping qualified customers upgrade to ductless heat pump systems by providing a \$1,500 rebate or zero-interest loan. A new ductless heat pump may also be eligible for an Oregon Residential Energy Tax Credit (up to \$400) and Federal Tax Credits for Energy Efficiency (up to \$1,500).

The new ductless heat pumps are very popular, and with the financial incentives currently available, now is a great time to increase your comfort and lower your heating and cooling bills.

How do I qualify?

If you are an EWEB customer, own or rent your home, and your home uses electric ceiling, wall, or baseboard heat as your primary source of heat, then you may be eligible.
